Portfolio: alexandergitsafronov.github.io/Portfolio

> Front-end Developer with 3+ years of commercial experience building landing pages, e-commerce platforms, and corporate websites. Proficient in HTML, CSS, JavaScript, React, and WordPress. Comfortable working in cross-functional teams, integrating third-party APIs, and delivering projects end-to-end — from layout to production.

WORK EXPERIENCE

Front-end Developer
Feb 2025 — Feb 2026

Traffic Devils

- Developed **landing pages and pre-landing pages** for affiliate marketing campaigns — responsive, cross-browser, pixel-perfect from Figma/PSD.
- Integrated custom designs into **WordPress**: sliced layouts into WP themes and page templates from scratch.
- Built a **Telegram bot** to automate routine team tasks and streamline internal workflows, reducing manual operations.
- Performed ongoing maintenance: bug fixing, performance improvements, and cross-browser compatibility.

Stack: HTML, CSS, JavaScript, WordPress, PHP templates

Front-end Developer
Jul 2023 — Sep 2024

Karat Team

- Built a full-featured **online store** integrated with a CRM system for automated order management.
- Configured API integrations with **CRM, Google Sheets, and Keitaro** — reduced order processing and tracking time.
- Developed multiple **landing pages** for product sales campaigns, meeting deadlines and client requirements.
- Created a **training website with a quiz/test module** for onboarding new call center employees.
- Delivered a **WooCommerce store** for a partner company, enabling a new sales channel.
- Implemented a **corporate multilingual website on React** with an admin panel supporting CRUD operations for service cards, rendered via API.

Stack: HTML, CSS, JavaScript, React, WordPress, REST API, Google Sheets API

Front-end Developer
Jul 2022 — Feb 2023

Platora

- Developed the front-end for a **large multi-page e-commerce platform** and several single-page sites.
- Implemented responsive layouts and UI components: forms, modals, carousels, navigation menus.
- Integrated **Google Maps API** for location-based features.

Stack: HTML, CSS, JavaScript, Bootstrap, jQuery
